EXPERIENCE

IT Skills & Development Officer

Quezon City, Philippines

Ateneo Management Information Systems Association (MISA)

Aug 2026 – Present

- Leading a **5-person** development team building MISA's merchandise ordering system, with manual payments verified through an admin portal and one dashboard kept in sync as the source of truth for orders and stock
- Served images from **Cloudflare R2** to avoid egress fees; automated order emails via SMTP in Edge Functions
- Leading a **4-person** team building MISA's services page for external clients, using the Figma MCP to carry designs and animations into code with a responsive desktop-to-mobile layout
- Co-facilitated *Intro to Python*, a beginner programming workshop for MISA members

Freelance Web Developer

Metro Manila, Philippines

Independent Contractor

Jan 2026 – Present

- Building **Garage 559** (AKEA × Max Orido Philippines), a performance-parts catalog on Next.js, TypeScript, Cloudflare Workers, and Supabase, with scroll-triggered reveals built on native CSS and IntersectionObserver
- Delivered **aceandco.org** for an accounting services firm on the Next.js App Router with React Server Components, achieving perfect **100** Lighthouse scores in Performance, SEO, and Best Practices (98 on mobile)
- Scoped engagements directly with clients, turning non-technical requests into defined deliverables and timelines

PROJECTS

DClutter | macOS File Triage App

github.com/RokiTheWise/DClutter

Sole Developer

Aug 2026 – Sep 2026

- Shipped a sandboxed macOS app in Swift and SwiftUI that surfaces files one at a time to keep, trash, or file into chosen folders by keyboard or trackpad gesture, ranked by a cleanup score weighing size, staleness, and duplicates
- Isolated scoring and session state in a UI-free core with file-safety rules enforced by tests (trash only, never delete); iterated from first public pre-release to **1.0** in one week

Pokémon Card Market Analysis

github.com/RokiTheWise/pokemon-card-market-analysis

Data Analyst

July 2026

- Analyzed **23,314** monthly prices across **540** cards (2021–2025) in Tableau, showing a reported **+37.46%** median gain was a **composition effect**: the same cohort through 2024 was down **22.84%**, with **60%** of cards below entry price
- Quantified the grading premium across price tiers, finding the multiplier collapses from **4.3×** under \$10 to **1.2×** above \$50, and derived a **\$125** raw-price break-even below which grading fees exceed expected value

LogiSketch | Boolean Equation Visualizer

logisketch.djenriquez.dev

Sole Developer

Jan 2026 – Feb 2026

- Built a Next.js logic tool whose recursive descent parser keeps equations, truth tables, and NAND/NOR circuits in sync
- Implemented **Quine-McCluskey** minimization to derive minimal Sum-of-Products forms

Aklatang Galera

aklatang-galera.djenriquez.dev

Sole Developer

Feb 2026 – Mar 2026

- Architected a bilingual civic portal in Next.js consolidating **100+** educational, livelihood, and government resources, with an integrated Semantic Scholar research engine
- Optimized for mobile-first accessibility, reaching Lighthouse Performance of **100** desktop / **98** mobile and **100** SEO on both; launched to the Puerto Galera community, driving **170+** engagements and **50+** shares in three days
